# DALLAS-BASED PETROLEUM FIRMS HAAS ENGINEERING AND WM COBB AND ASSOCIATES MERGE TO CREATE HAAS & COBB ENGINEERING

New Firm to Provide A Comprehensive Reservoir Engineering Solution

**DALLAS, TEXAS – Feb. 1, 2023** – Today, [Haas Engineering](#) and [WM Cobb and Associates, Inc.](#) are announcing that effective Jan. 1, 2023, the two firms have merged to create Haas & Cobb Engineering, LLC. This new firm will expand on two companies' expertise, offering clients a deeper bench of knowledge and experience as a full-service geologic and engineering solution to clients in the petroleum industry.

"This merger was the next logical step for our companies, we've long been partners with WM Cobb and value and respect their work," said Thad Toups, President, and CEO of Haas & Cobb Engineering. "This merger will provide our clients a single, comprehensive engineering team for all of their needs."

Haas and Cobb Engineering will bring more than 80 years of combined experience to clients, a boutique, small-firm feel, and a fresh approach in everything they do. While officially merged, the firms will continue to operate independently through Q1 and begin transitioning into one firm and office in Q2 and Q3 of 2023.

Haas & Cobb's combined team will bring to market the top-in-class engineering and geologic services each respective firm has been known for, including:

- Trusted independent reserves reports and audits
- Customized technical support and evaluation studies
- Worldwide experience in conventional projects and domestic experience in unconventional projects
- Subsurface modeling
- Reservoir simulation
- Enhanced oil recovery
- Gas injection and carbon capture storage and unitization

- Cobb's renowned flagship waterflooding course
- Expert witness testimony

"Combining with the Haas Engineering team brings together some of the industry's leading petroleum experts. We're excited about our new future and how we can better serve clients and the industry with our comprehensive list of service offerings," said Randall Brush, President of WM Cobb and Associates, Inc.

This merger is a significant step forward for both firms in an ever-changing industry. Haas Engineering, which was formed in 1980, and WM Cobb, which was formed in 1983 are both committed to ensuring the business stays true to their shared core objective of providing clients with the highest quality engineering and consulting services available.

More details relating to the merger and creation of Haas & Cobb Engineering will be announced in the coming months as the businesses become fully integrated. For more information about Haas & Cobb Engineering, visit [haasandcobb.com](http://haasandcobb.com).

#### **About Haas & Cobb Engineering, LLC:**

Haas & Cobb Engineering is a full-service petroleum engineering firm. Based in Dallas, Texas, the firm brings over 80 years of experience in engineering and geologic services for the petroleum industry. Formed from the merger of two companies, Haas Engineering and WM Cobb and Associates, the firm pulls on this shared experience and expertise, providing public and private exploration and production companies, mineral companies, investors and financial institutions expert consulting for conventional and unconventional projects. The firm's specialties include performing reserves reports and audits, customized technical support and evaluation studies, subsurface simulation, enhanced oil recovery, gas storage carbon capture, storage and unitization, expert witness testimony, and the world-renown Cobb Watereflooding course.
